NT-C-035 | UI/UX Design | Course Knowledge Profile

Identity, purpose, prerequisites, scope and boundaries

Category	Design & Product
Target learners	Learners targeting user-interface, user-experience and product-design roles.
Prerequisites	Basic computer use, communication and visual interest.
Approved duration	12-16 weeks / 140-180 guided hours.
Final outcome	Research, design, prototype and test an accessible digital-product experience with documented decisions.
Assessment profile	Creative

Approved tools / platforms

Figma or approved design/prototyping tool, research templates, accessibility checks and collaboration tools.

Knowledge boundaries

Include	Quality rule	Exclude / escalate
The eight approved modules, four sections, named tools, projects and mapped entry-level roles.	Require the brief, working/source files, design rationale, iteration evidence, technical quality and accessible export.	Do not treat a copied template or final export alone as proof of original process and ownership.
Current product/platform procedures only when version and date are known.	Use primary documentation and record the source version.	Do not invent current commands, prices, tax rates, policies or certification status.
Evidence-based career guidance.	Cite tests, projects, capstone, viva and verified resume evidence.	No guaranteed job, placement, salary, interview or employer claim.

LLM answer pattern: identify the course and version, answer from approved records, cite record IDs, distinguish verified facts from guidance, and state any missing evidence.

NT-C-035 | UI/UX Design | NT-C-035-S01 Deep Knowledge

Modules 1-2 | objectives, concepts, evidence and remediation

Section competency	User-centred design, problem framing and ethics; Interviews, surveys, desk research and synthesis
Completion evidence	Design brief; Research summary
Section weight	20% of the weighted mock-test average
Assessment	8 knowledge items (20 marks) + 2 critique/scenario items (20) + 1 timed artifact brief with rubric (60)

Module 1 - UX foundation

Objective: User-centred design, problem framing and ethics
Observable evidence: Design brief

Concept	Approved knowledge statement	Application behaviour	Evidence
User-centred design	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when user-centred design is appropriate; apply it in a UI/UX Design task; verify the result.	Design brief
problem framing	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when problem framing is appropriate; apply it in a UI/UX Design task; verify the result.	Design brief
ethics	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when ethics is appropriate; apply it in a UI/UX Design task; verify the result.	Design brief

Module 2 - Research

Objective: Interviews, surveys, desk research and synthesis
Observable evidence: Research summary

Concept	Approved knowledge statement	Application behaviour	Evidence
Interviews	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when interviews is appropriate; apply it in a UI/UX Design task; verify the result.	Research summary
surveys	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when surveys is appropriate; apply it in a UI/UX Design task; verify the result.	Research summary
desk research	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when desk research is appropriate; apply it in a UI/UX Design task; verify the result.	Research summary
synthesis	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when synthesis is appropriate; apply it in a UI/UX Design task; verify the result.	Research summary

Remediation: If the learner cannot explain the purpose, complete the stated task or provide Design brief; Research summary, return to Modules 1-2, complete one guided practice and then use a new equivalent test form.

NT-C-035 | UI/UX Design | NT-C-035-S02 Deep Knowledge

Modules 3-4 | objectives, concepts, evidence and remediation

Section competency	Needs, pain points, scenarios and journey maps; Content structure, flows and navigation
Completion evidence	Persona/journey set; Site map and flow
Section weight	25% of the weighted mock-test average
Assessment	8 knowledge items (20 marks) + 2 critique/scenario items (20) + 1 timed artifact brief with rubric (60)

Module 3 - Personas and journeys

Objective: Needs, pain points, scenarios and journey maps
Observable evidence: Persona/journey set

Concept	Approved knowledge statement	Application behaviour	Evidence
Needs	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when needs is appropriate; apply it in a UI/UX Design task; verify the result.	Persona/journey set
pain points	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when pain points is appropriate; apply it in a UI/UX Design task; verify the result.	Persona/journey set
scenarios	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when scenarios is appropriate; apply it in a UI/UX Design task; verify the result.	Persona/journey set
journey maps	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when journey maps is appropriate; apply it in a UI/UX Design task; verify the result.	Persona/journey set

Module 4 - Information architecture

Objective: Content structure, flows and navigation
Observable evidence: Site map and flow

Concept	Approved knowledge statement	Application behaviour	Evidence
Content structure	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when content structure is appropriate; apply it in a UI/UX Design task; verify the result.	Site map and flow
flows	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when flows is appropriate; apply it in a UI/UX Design task; verify the result.	Site map and flow
navigation	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when navigation is appropriate; apply it in a UI/UX Design task; verify the result.	Site map and flow

Remediation: If the learner cannot explain the purpose, complete the stated task or provide Persona/journey set; Site map and flow, return to Modules 3-4, complete one guided practice and then use a new equivalent test form.

NT-C-035 | UI/UX Design | NT-C-035-S03 Deep Knowledge

Modules 5-6 | objectives, concepts, evidence and remediation

Section competency	Low-fidelity layouts and interaction logic; Typography, colour, grids, components and design systems
Completion evidence	Wireframe prototype; High-fidelity screens
Section weight	25% of the weighted mock-test average
Assessment	8 knowledge items (20 marks) + 2 critique/scenario items (20) + 1 timed artifact brief with rubric (60)

Module 5 - Wireframing

Objective: Low-fidelity layouts and interaction logic
Observable evidence: Wireframe prototype

Concept	Approved knowledge statement	Application behaviour	Evidence
Low-fidelity layouts	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when low-fidelity layouts is appropriate; apply it in a UI/UX Design task; verify the result.	Wireframe prototype
interaction logic	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when interaction logic is appropriate; apply it in a UI/UX Design task; verify the result.	Wireframe prototype

Module 6 - UI design

Objective: Typography, colour, grids, components and design systems
Observable evidence: High-fidelity screens

Concept	Approved knowledge statement	Application behaviour	Evidence
Typography	The structured use of type to support hierarchy, readability and visual meaning. In UI/UX Design, it must be demonstrated through an observable task, not only recalled as a definition.	Explain when typography is appropriate; apply it in a UI/UX Design task; verify the result.	High-fidelity screens
colour	The controlled use of hue, value and contrast for communication, consistency and accessibility. In UI/UX Design, it must be demonstrated through an observable task, not only recalled as a definition.	Explain when colour is appropriate; apply it in a UI/UX Design task; verify the result.	High-fidelity screens
grids	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when grids is appropriate; apply it in a UI/UX Design task; verify the result.	High-fidelity screens
components	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when components is appropriate; apply it in a UI/UX Design task; verify the result.	High-fidelity screens
design systems	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when design systems is appropriate; apply it in a UI/UX Design task; verify the result.	High-fidelity screens

Remediation: If the learner cannot explain the purpose, complete the stated task or provide Wireframe prototype; High-fidelity screens, return to Modules 5-6, complete one guided practice and then use a new equivalent test form.

NT-C-035 | UI/UX Design | NT-C-035-S04 Deep Knowledge

Modules 7-8 | objectives, concepts, evidence and remediation

Section competency	Interactive prototype, usability tasks and iteration; Accessibility, handoff and case-study storytelling
Completion evidence	Test report; Product design case
Section weight	30% of the weighted mock-test average
Assessment	8 knowledge items (20 marks) + 2 critique/scenario items (20) + 1 timed artifact brief with rubric (60)

Module 7 - Prototyping and testing

Objective: Interactive prototype, usability tasks and iteration
Observable evidence: Test report

Concept	Approved knowledge statement	Application behaviour	Evidence
Interactive prototype	An interactive representation used to test a proposed experience before final implementation. In UI/UX Design, it must be demonstrated through an observable task, not only recalled as a definition.	Explain when interactive prototype is appropriate; apply it in a UI/UX Design task; verify the result.	Test report
usability tasks	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when usability tasks is appropriate; apply it in a UI/UX Design task; verify the result.	Test report
iteration	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when iteration is appropriate; apply it in a UI/UX Design task; verify the result.	Test report

Module 8 - Portfolio capstone

Objective: Accessibility, handoff and case-study storytelling
Observable evidence: Product design case

Concept	Approved knowledge statement	Application behaviour	Evidence
Accessibility	Design and implementation that allows people with diverse abilities to use a product. In UI/UX Design, it must be demonstrated through an observable task, not only recalled as a definition.	Explain when accessibility is appropriate; apply it in a UI/UX Design task; verify the result.	Product design case
handoff	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when handoff is appropriate; apply it in a UI/UX Design task; verify the result.	Product design case
case-study storytelling	A defined competency within UI/UX Design. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when case-study storytelling is appropriate; apply it in a UI/UX Design task; verify the result.	Product design case

Remediation: If the learner cannot explain the purpose, complete the stated task or provide Test report; Product design case, return to Modules 7-8, complete one guided practice and then use a new equivalent test form.

NT-C-035 | UI/UX Design | Skill Ontology & Dependency Map

Atomic skills, learning order and evidence strength

Skill ID	Competency	Depends on	Evidence	Type
NT-C-035-SK01	UX foundation	Prerequisite foundation	Design brief	Critical
NT-C-035-SK02	Research	M01 plus earlier foundations	Research summary	Critical
NT-C-035-SK03	Personas and journeys	M02 plus earlier foundations	Persona/journey set	Supporting
NT-C-035-SK04	Information architecture	M03 plus earlier foundations	Site map and flow	Supporting
NT-C-035-SK05	Wireframing	M04 plus earlier foundations	Wireframe prototype	Supporting
NT-C-035-SK06	UI design	M05 plus earlier foundations	High-fidelity screens	Critical
NT-C-035-SK07	Prototyping and testing	M06 plus earlier foundations	Test report	Supporting
NT-C-035-SK08	Portfolio capstone	M07 plus earlier foundations	Product design case	Critical

Evidence-strength hierarchy

Strength	Evidence source	Use
High	Trainer-observed practical, viva, working source/project files and reproducible output.	May support verified mastery when rubric threshold is met.
Medium	Scored mock tests, reviewed assignments and documented portfolio artifacts.	Supports mastery with corroboration.
Low	Resume claim, self-report, attendance or video completion without demonstration.	May trigger verification; cannot alone support Apply Now.

CareerTours must not treat attendance, time spent or content opened as skill mastery.

NT-C-035 | UI/UX Design | Assessment Knowledge & Sample Items

Non-live examples for LLM training and evaluation

Sample ID	Type	Question	Approved answer / rubric anchor
NT-C-035-S01-EX01	Evidence/application	What evidence best demonstrates the combined competency of UX foundation and Research?	The learner should provide Design brief; Research summary and explain how the work applies User-centred design, problem framing and ethics; Interviews, surveys, desk research and synthesis. Recall alone is insufficient.
NT-C-035-S01-EX02	Scenario/remediation	A learner reports completing Research but cannot produce Research summary. What should CareerTours do?	Mark the evidence Not Yet Verified, assign practice from NT-C-035-S01, request Research summary, and allow a new equivalent test only after remediation.
NT-C-035-S02-EX01	Evidence/application	What evidence best demonstrates the combined competency of Personas and journeys and Information architecture?	The learner should provide Persona/journey set; Site map and flow and explain how the work applies Needs, pain points, scenarios and journey maps; Content structure, flows and navigation. Recall alone is insufficient.
NT-C-035-S02-EX02	Scenario/remediation	A learner reports completing Information architecture but cannot produce Site map and flow. What should CareerTours do?	Mark the evidence Not Yet Verified, assign practice from NT-C-035-S02, request Site map and flow, and allow a new equivalent test only after remediation.
NT-C-035-S03-EX01	Evidence/application	What evidence best demonstrates the combined competency of Wireframing and UI design?	The learner should provide Wireframe prototype; High-fidelity screens and explain how the work applies Low-fidelity layouts and interaction logic; Typography, colour, grids, components and design systems. Recall alone is insufficient.
NT-C-035-S03-EX02	Scenario/remediation	A learner reports completing UI design but cannot produce High-fidelity screens. What should CareerTours do?	Mark the evidence Not Yet Verified, assign practice from NT-C-035-S03, request High-fidelity screens, and allow a new equivalent test only after remediation.
NT-C-035-S04-EX01	Evidence/application	What evidence best demonstrates the combined competency of Prototyping and testing and Portfolio capstone?	The learner should provide Test report; Product design case and explain how the work applies Interactive prototype, usability tasks and iteration; Accessibility, handoff and case-study storytelling. Recall alone is insufficient.
NT-C-035-S04-EX02	Scenario/remediation	A learner reports completing Portfolio capstone but cannot produce Product design case. What should CareerTours do?	Mark the evidence Not Yet Verified, assign practice from NT-C-035-S04, request Product design case, and allow a new equivalent test only after remediation.

Live bank rule: Generate at least three times the live quantity for each section using the approved Creative blueprint. Human-review every scored item before initial production release.

NT-C-035 | UI/UX Design | Labs, Projects & Scoring Rubrics

Practical proof of learning and ownership

Level	Approved project	Skills evidenced	Required deliverables
Mini 1	App flow redesign	Research and wireframes	Brief; working/source file or reproducible environment; output; validation notes; reflection.
Mini 2	Design-system starter	Components and accessibility	Brief; working/source file or reproducible environment; output; validation notes; reflection.
Capstone	Product case study	Prototype, usability testing and handoff	Brief; working/source file or reproducible environment; output; validation notes; reflection.

Standard project rubric

Dimension	Weight	What earns credit
Problem framing	15%	Clear objective, user/business need, assumptions and success criteria.
Technical/design accuracy	25%	Correct methods, appropriate tools and sound decisions.
Completeness	15%	Required features, assets, data or workflow are present.
Testing and validation	15%	Important normal, edge, quality or failure cases are checked.
Evidence and reproducibility	15%	Source/working files, setup, inputs, outputs and version information are available.
Documentation	5%	Concise structure, instructions and limitations.
Viva / ownership	10%	Learner can explain decisions, demonstrate work and respond to a change request.

Require the brief, working/source files, design rationale, iteration evidence, technical quality and accessible export.

NT-C-035 | UI/UX Design | Career Roles, Evidence & Gap Actions

Explainable top-three occupation matching

Rank	Occupation	Default weighted skills	Minimum evidence	Gap action
1	Junior UI/UX Designer	Research 34% [critical]; wireframes 33% [critical]; UI 33%	Case-study portfolio	If a critical skill is below 60 or case-study portfolio is missing, return Improve First or Needs Evidence with the linked module/project.
2	Product Design Trainee	Flows 34% [critical]; systems 33% [critical]; prototypes 33%	Interactive product case	If a critical skill is below 60 or interactive product case is missing, return Improve First or Needs Evidence with the linked module/project.
3	UX Research/Design Associate	Research 34% [critical]; synthesis 33% [critical]; testing 33%	Usability report	If a critical skill is below 60 or usability report is missing, return Improve First or Needs Evidence with the linked module/project.

Course readiness	45% section mocks + 20% mini projects + 25% capstone + 10% viva.
Role readiness	45% role-relevant mastery + 25% projects/capstone + 20% aligned mocks + 10% verified resume evidence.
Evidence confidence	Show separately; Apply Now requires at least 70.
Resume extraction	Use only relevant skills, projects, education, experience and portfolio evidence; minimise personal data before external model processing.

A student may be Apply Now for one mapped occupation and Improve First for another. Return independent evidence and gaps for each role.

NT-C-035 | UI/UX Design | FAQs, Misconceptions & LLM Response Pack

Course-specific retrieval and response patterns

Approved FAQ	Answer
Who is UI/UX Design for?	Learners targeting user-interface, user-experience and product-design roles.
What should I know before starting?	Basic computer use, communication and visual interest.
How long is the approved learning journey?	12-16 weeks / 140-180 guided hours.
What will I be able to demonstrate?	Research, design, prototype and test an accessible digital-product experience with documented decisions.
Does completion guarantee a job?	No. Completion and role readiness are evidence-based guidance; employment, placement, salary and employer selection are not guaranteed.
What if I fail a section?	CareerTours identifies the failed skill tags and module, assigns targeted practice, and permits an equivalent retest after remediation.

Misconception	Approved correction
Attendance proves mastery	False - require tests and observable practical/project evidence.
One total score proves every role fit	False - calculate each occupation using its weighted skills and evidence.
The LLM can add missing details	False - retrieve approved records or state that evidence is insufficient.
Course completion guarantees employment	False - never claim guaranteed job, placement, salary or interview.
UI/UX Design knowledge never changes	False - version-sensitive tools, laws, taxes, security and platform procedures require review.
