

NT-C-021 | Business Analysis | Course Knowledge Profile

Identity, purpose, prerequisites, scope and boundaries

Category	Business & Process
Target learners	Learners targeting requirements, process and solution-analysis roles.
Prerequisites	Clear communication and basic business understanding.
Approved duration	10-14 weeks / 100-150 guided hours.
Final outcome	Elicit, document, validate and manage business requirements through solution delivery and UAT.
Assessment profile	Business/Office

Approved tools / platforms

Process-mapping tools, office suite, backlog/issue tracker, basic SQL/reporting tools.

Knowledge boundaries

Include	Quality rule	Exclude / escalate
The eight approved modules, four sections, named tools, projects and mapped entry-level roles.	Require accurate records, transparent formulas or workflows, validation controls, business explanation and reproducible outputs.	Do not use outdated rates, laws or platform procedures without date-specific verification.
Current product/platform procedures only when version and date are known.	Use primary documentation and record the source version.	Do not invent current commands, prices, tax rates, policies or certification status.
Evidence-based career guidance.	Cite tests, projects, capstone, viva and verified resume evidence.	No guaranteed job, placement, salary, interview or employer claim.

LLM answer pattern: identify the course and version, answer from approved records, cite record IDs, distinguish verified facts from guidance, and state any missing evidence.

NT-C-021 | Business Analysis | NT-C-021-S01 Deep Knowledge

Modules 1-2 | objectives, concepts, evidence and remediation

Section competency	Problem definition, scope and stakeholders; Interviews, workshops, observation and surveys
Completion evidence	Project charter; Elicitation plan
Section weight	20% of the weighted mock-test average
Assessment	10 concept MCQ (30 marks) + 4 business scenarios (30) + 1 practical case/workbook (40)

Module 1 - BA lifecycle

Objective: Problem definition, scope and stakeholders

Observable evidence: Project charter

Concept	Approved knowledge statement	Application behaviour	Evidence
Problem definition	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when problem definition is appropriate; apply it in a Business Analysis task; verify the result.	Project charter
scope	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when scope is appropriate; apply it in a Business Analysis task; verify the result.	Project charter
stakeholders	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when stakeholders is appropriate; apply it in a Business Analysis task; verify the result.	Project charter

Module 2 - Elicitation

Objective: Interviews, workshops, observation and surveys

Observable evidence: Elicitation plan

Concept	Approved knowledge statement	Application behaviour	Evidence
Interviews	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when interviews is appropriate; apply it in a Business Analysis task; verify the result.	Elicitation plan
workshops	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when workshops is appropriate; apply it in a Business Analysis task; verify the result.	Elicitation plan
observation	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when observation is appropriate; apply it in a Business Analysis task; verify the result.	Elicitation plan
surveys	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when surveys is appropriate; apply it in a Business Analysis task; verify the result.	Elicitation plan

Remediation: If the learner cannot explain the purpose, complete the stated task or provide Project charter; Elicitation plan, return to Modules 1-2, complete one guided practice and then use a new equivalent test form.

NT-C-021 | Business Analysis | NT-C-021-S02 Deep Knowledge

Modules 3-4 | objectives, concepts, evidence and remediation

Section competency	As-is/to-be maps, gaps and root causes; Functional/non-functional requirements and traceability
Completion evidence	Process model; Requirements document
Section weight	25% of the weighted mock-test average
Assessment	10 concept MCQ (30 marks) + 4 business scenarios (30) + 1 practical case/workbook (40)

Module 3 - Process analysis

Objective: As-is/to-be maps, gaps and root causes

Observable evidence: Process model

Concept	Approved knowledge statement	Application behaviour	Evidence
As-is/to-be maps	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when as-is/to-be maps is appropriate; apply it in a Business Analysis task; verify the result.	Process model
gaps	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when gaps is appropriate; apply it in a Business Analysis task; verify the result.	Process model
root causes	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when root causes is appropriate; apply it in a Business Analysis task; verify the result.	Process model

Module 4 - Requirements

Objective: Functional/non-functional requirements and traceability

Observable evidence: Requirements document

Concept	Approved knowledge statement	Application behaviour	Evidence
Functional/non-functional requirements	Documented stakeholder needs, constraints and acceptance conditions. In Business Analysis, it must be demonstrated through an observable task, not only recalled as a definition.	Explain when functional/non-functional requirements is appropriate; apply it in a Business Analysis task; verify the result.	Requirements document
traceability	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when traceability is appropriate; apply it in a Business Analysis task; verify the result.	Requirements document

Remediation: If the learner cannot explain the purpose, complete the stated task or provide Process model; Requirements document, return to Modules 3-4, complete one guided practice and then use a new equivalent test form.

NT-C-021 | Business Analysis | NT-C-021-S03 Deep Knowledge

Modules 5-6 | objectives, concepts, evidence and remediation

Section competency	Epics, user stories and acceptance criteria; Data needs, KPIs and basic SQL interpretation
Completion evidence	Prioritised backlog; Reporting specification
Section weight	25% of the weighted mock-test average
Assessment	10 concept MCQ (30 marks) + 4 business scenarios (30) + 1 practical case/workbook (40)

Module 5 - Agile analysis

Objective: Epics, user stories and acceptance criteria

Observable evidence: Prioritised backlog

Concept	Approved knowledge statement	Application behaviour	Evidence
Epics	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when epics is appropriate; apply it in a Business Analysis task; verify the result.	Prioritised backlog
user stories	Short value-oriented requirements supported by testable acceptance criteria. In Business Analysis, it must be demonstrated through an observable task, not only recalled as a definition.	Explain when user stories is appropriate; apply it in a Business Analysis task; verify the result.	Prioritised backlog
acceptance criteria	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when acceptance criteria is appropriate; apply it in a Business Analysis task; verify the result.	Prioritised backlog

Module 6 - Data and reporting

Objective: Data needs, KPIs and basic SQL interpretation

Observable evidence: Reporting specification

Concept	Approved knowledge statement	Application behaviour	Evidence
Data needs	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when data needs is appropriate; apply it in a Business Analysis task; verify the result.	Reporting specification
KPIs	A defined metric tied to a business objective and decision. In Business Analysis, it must be demonstrated through an observable task, not only recalled as a definition.	Explain when kpis is appropriate; apply it in a Business Analysis task; verify the result.	Reporting specification
basic SQL interpretation	A language for defining, querying and controlling relational data. In Business Analysis, it must be demonstrated through an observable task, not only recalled as a definition.	Explain when basic sql interpretation is appropriate; apply it in a Business Analysis task; verify the result.	Reporting specification

Remediation: If the learner cannot explain the purpose, complete the stated task or provide Prioritised backlog; Reporting specification, return to Modules 5-6, complete one guided practice and then use a new equivalent test form.

NT-C-021 | Business Analysis | NT-C-021-S04 Deep Knowledge

Modules 7-8 | objectives, concepts, evidence and remediation

Section competency	UAT planning, test scenarios and defects; Change, communication and benefits tracking
Completion evidence	UAT pack; Complete BA case
Section weight	30% of the weighted mock-test average
Assessment	10 concept MCQ (30 marks) + 4 business scenarios (30) + 1 practical case/workbook (40)

Module 7 - Solution validation

Objective: UAT planning, test scenarios and defects

Observable evidence: UAT pack

Concept	Approved knowledge statement	Application behaviour	Evidence
UAT planning	User acceptance testing that validates a solution against agreed business needs. In Business Analysis, it must be demonstrated through an observable task, not only recalled as a definition.	Explain when uat planning is appropriate; apply it in a Business Analysis task; verify the result.	UAT pack
test scenarios	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when test scenarios is appropriate; apply it in a Business Analysis task; verify the result.	UAT pack
defects	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when defects is appropriate; apply it in a Business Analysis task; verify the result.	UAT pack

Module 8 - Capstone

Objective: Change, communication and benefits tracking

Observable evidence: Complete BA case

Concept	Approved knowledge statement	Application behaviour	Evidence
Change	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when change is appropriate; apply it in a Business Analysis task; verify the result.	Complete BA case
communication	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when communication is appropriate; apply it in a Business Analysis task; verify the result.	Complete BA case
benefits tracking	A defined competency within Business Analysis. The learner must explain its purpose, apply it in an appropriate scenario, verify the result and produce the specified evidence.	Explain when benefits tracking is appropriate; apply it in a Business Analysis task; verify the result.	Complete BA case

Remediation: If the learner cannot explain the purpose, complete the stated task or provide UAT pack; Complete BA case, return to Modules 7-8, complete one guided practice and then use a new equivalent test form.

NT-C-021 | Business Analysis | Skill Ontology & Dependency Map

Atomic skills, learning order and evidence strength

Skill ID	Competency	Depends on	Evidence	Type
NT-C-021-SK01	BA lifecycle	Prerequisite foundation	Project charter	Critical
NT-C-021-SK02	Elicitation	M01 plus earlier foundations	Elicitation plan	Critical
NT-C-021-SK03	Process analysis	M02 plus earlier foundations	Process model	Supporting
NT-C-021-SK04	Requirements	M03 plus earlier foundations	Requirements document	Supporting
NT-C-021-SK05	Agile analysis	M04 plus earlier foundations	Prioritised backlog	Supporting
NT-C-021-SK06	Data and reporting	M05 plus earlier foundations	Reporting specification	Critical
NT-C-021-SK07	Solution validation	M06 plus earlier foundations	UAT pack	Supporting
NT-C-021-SK08	Capstone	M07 plus earlier foundations	Complete BA case	Critical

Evidence-strength hierarchy

Strength	Evidence source	Use
High	Trainer-observed practical, viva, working source/project files and reproducible output.	May support verified mastery when rubric threshold is met.
Medium	Scored mock tests, reviewed assignments and documented portfolio artifacts.	Supports mastery with corroboration.
Low	Resume claim, self-report, attendance or video completion without demonstration.	May trigger verification; cannot alone support Apply Now.

CareerTours must not treat attendance, time spent or content opened as skill mastery.

NT-C-021 | Business Analysis | Assessment Knowledge & Sample Items

Non-live examples for LLM training and evaluation

Sample ID	Type	Question	Approved answer / rubric anchor
NT-C-021-S01-EX01	Evidence/application	What evidence best demonstrates the combined competency of BA lifecycle and Elicitation?	The learner should provide Project charter; Elicitation plan and explain how the work applies Problem definition, scope and stakeholders; Interviews, workshops, observation and surveys. Recall alone is insufficient.
NT-C-021-S01-EX02	Scenario/remediation	A learner reports completing Elicitation but cannot produce Elicitation plan. What should CareerTours do?	Mark the evidence Not Yet Verified, assign practice from NT-C-021-S01, request Elicitation plan, and allow a new equivalent test only after remediation.
NT-C-021-S02-EX01	Evidence/application	What evidence best demonstrates the combined competency of Process analysis and Requirements?	The learner should provide Process model; Requirements document and explain how the work applies As-is/to-be maps, gaps and root causes; Functional/non-functional requirements and traceability. Recall alone is insufficient.
NT-C-021-S02-EX02	Scenario/remediation	A learner reports completing Requirements but cannot produce Requirements document. What should CareerTours do?	Mark the evidence Not Yet Verified, assign practice from NT-C-021-S02, request Requirements document, and allow a new equivalent test only after remediation.
NT-C-021-S03-EX01	Evidence/application	What evidence best demonstrates the combined competency of Agile analysis and Data and reporting?	The learner should provide Prioritised backlog; Reporting specification and explain how the work applies Epics, user stories and acceptance criteria; Data needs, KPIs and basic SQL interpretation. Recall alone is insufficient.
NT-C-021-S03-EX02	Scenario/remediation	A learner reports completing Data and reporting but cannot produce Reporting specification. What should CareerTours do?	Mark the evidence Not Yet Verified, assign practice from NT-C-021-S03, request Reporting specification, and allow a new equivalent test only after remediation.
NT-C-021-S04-EX01	Evidence/application	What evidence best demonstrates the combined competency of Solution validation and Capstone?	The learner should provide UAT pack; Complete BA case and explain how the work applies UAT planning, test scenarios and defects; Change, communication and benefits tracking. Recall alone is insufficient.
NT-C-021-S04-EX02	Scenario/remediation	A learner reports completing Capstone but cannot produce Complete BA case. What should CareerTours do?	Mark the evidence Not Yet Verified, assign practice from NT-C-021-S04, request Complete BA case, and allow a new equivalent test only after remediation.

Live bank rule: Generate at least three times the live quantity for each section using the approved Business/Office blueprint. Human-review every scored item before initial production release.

NT-C-021 | Business Analysis | Labs, Projects & Scoring Rubrics

Practical proof of learning and ownership

Level	Approved project	Skills evidenced	Required deliverables
Mini 1	Process-improvement study	As-is/to-be and gaps	Brief; working/source file or reproducible environment; output; validation notes; reflection.
Mini 2	Product backlog	Stories, criteria and priorities	Brief; working/source file or reproducible environment; output; validation notes; reflection.
Capstone	Service-system analysis	Requirements, traceability and UAT	Brief; working/source file or reproducible environment; output; validation notes; reflection.

Standard project rubric

Dimension	Weight	What earns credit
Problem framing	15%	Clear objective, user/business need, assumptions and success criteria.
Technical/design accuracy	25%	Correct methods, appropriate tools and sound decisions.
Completeness	15%	Required features, assets, data or workflow are present.
Testing and validation	15%	Important normal, edge, quality or failure cases are checked.
Evidence and reproducibility	15%	Source/working files, setup, inputs, outputs and version information are available.
Documentation	5%	Concise structure, instructions and limitations.
Viva / ownership	10%	Learner can explain decisions, demonstrate work and respond to a change request.

Require accurate records, transparent formulas or workflows, validation controls, business explanation and reproducible outputs.

NT-C-021 | Business Analysis | Career Roles, Evidence & Gap Actions

Explainable top-three occupation matching

Rank	Occupation	Default weighted skills	Minimum evidence	Gap action
1	Junior Business Analyst	Elicitation 34% [critical]; requirements 33% [critical]; process maps 33%	BA case portfolio	If a critical skill is below 60 or ba case portfolio is missing, return Improve First or Needs Evidence with the linked module/project.
2	Requirements Analyst Trainee	Documentation 50% [critical]; traceability 50% [critical]	Requirements pack	If a critical skill is below 60 or requirements pack is missing, return Improve First or Needs Evidence with the linked module/project.
3	Process Analyst - Junior	Process mapping 50% [critical]; improvement 50% [critical]	As-is/to-be study	If a critical skill is below 60 or as-is/to-be study is missing, return Improve First or Needs Evidence with the linked module/project.

Course readiness	45% section mocks + 20% mini projects + 25% capstone + 10% viva.
Role readiness	45% role-relevant mastery + 25% projects/capstone + 20% aligned mocks + 10% verified resume evidence.
Evidence confidence	Show separately; Apply Now requires at least 70.
Resume extraction	Use only relevant skills, projects, education, experience and portfolio evidence; minimise personal data before external model processing.

A student may be Apply Now for one mapped occupation and Improve First for another. Return independent evidence and gaps for each role.

NT-C-021 | Business Analysis | FAQs, Misconceptions & LLM Response Pack

Course-specific retrieval and response patterns

Approved FAQ	Answer
Who is Business Analysis for?	Learners targeting requirements, process and solution-analysis roles.
What should I know before starting?	Clear communication and basic business understanding.
How long is the approved learning journey?	10-14 weeks / 100-150 guided hours.
What will I be able to demonstrate?	Elicit, document, validate and manage business requirements through solution delivery and UAT.
Does completion guarantee a job?	No. Completion and role readiness are evidence-based guidance; employment, placement, salary and employer selection are not guaranteed.
What if I fail a section?	CareerTours identifies the failed skill tags and module, assigns targeted practice, and permits an equivalent retest after remediation.

Misconception	Approved correction
Attendance proves mastery	False - require tests and observable practical/project evidence.
One total score proves every role fit	False - calculate each occupation using its weighted skills and evidence.
The LLM can add missing details	False - retrieve approved records or state that evidence is insufficient.
Course completion guarantees employment	False - never claim guaranteed job, placement, salary or interview.
Business Analysis knowledge never changes	False - version-sensitive tools, laws, taxes, security and platform procedures require review.
